**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 11/15/06.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 26-40 are rejected under 35 U.S.C. 102(b) as being anticipated by Kruger et al #2002/0044833. Kruger et al, paragraph [0021], discloses a leaching chamber having a lengths between 2-10 feet and lengths of 4-8 feet being preferred. The nature of the shorter length chambers would allow for an increase in curve factor and to increase the number of joints for a given length of chamber string. It appears that the characteristics such as length to width aspect ratio, the flexibility factor, and weight per foot would be covered by Kruger depending on the actual length of chamber, since it also appears that the chambers may be made from similar materials. It also appears that depending on the actual length of the chamber and perhaps the strength of the person installing, that a single person is capable of manipulating chambers so as to install the chambers within the trench.

### ***Response to Arguments***

3. Applicant's arguments filed 11/15/06 have been fully considered but they are not persuasive. Applicant's argue that the chamber of Kruger is for stormwater and not leaching and that the chambers are not placed in trenches. However, as stated above,

the chambers are also used for leaching and these chambers may be placed in a hole i.e. trench having a width and length consistent with the number of chambers being used. Thereby, if a single line of chambers is required, then a trench is formed, not a pit. Applicant points out unexpected results; however, evidence of secondary considerations, such as unexpected results cannot overcome a 35 USC 102 rejection. Furthermore, Kruger discloses chambers which may range from 2-10 feet preferably 4-8 feet to facilitate handling and installation for example.

### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Frederick L. Lagman whose telephone number is 571-272-7043. The examiner can normally be reached on Monday-Friday 9:00am to 5:30pm.
